

# SONORAN DESERT DISCOVERY

## Ecology & Evolutionary Biology

*Fall 2009, ECOL 464/564, Dr. Kevin Bonine, Tiffany Alvarez*

The student-developed workshops from this brand new course have proven to be a valuable outreach resource for the southern Arizona community!

Sonoran Desert Discovery was designed to foster a deeper understanding of ecology for both enrolled students and the public. Small groups of students developed fantastic outreach workshops to share information and research with visitors to Biosphere 2.

We would especially like to thank the staff at Biosphere 2 who collaborated with the class and accommodated the students as they presented the workshops at their facility.

Thanks to the success of the course this semester, the class will continue to be offered!
