ECOL 437 LAB/DISCUSSION GROUP

movie 1

movie 2

## **REMINDER:**

Due 27 February: Research proposal question, along with (1) short paragraph explaining why it is interesting and (2) annotated bibliography with 5 primary literature sources.

### ***What is your question?***

-Should be specific, interesting, and able to be answered within the scope of your proposed project

The most interesting questions often:

- Examine previously unexplored mechanism for observed phenomenon
- Test a crucial assumption for accepted dogma
- Examine previously reported mechanisms, but in an irresistibly charismatic species or ecosystem

### **Quiz:**

1. What is a fovea?
2. Explain how fish olfactory systems are able to “learn” odors through processes that do not necessarily occur in the brain.
